

# Prison sentence discrimination in US Courts

Fernando Voticky  
Ramón Galindo

# Problem and hypothesis

Judges give sentences based on the law, but depending on personal criteria.

Enormous historic evidence of racial and sociodemographic discrimination.

**Can we spot evidence of systemic injustice towards people of certain groups?**

**Hypothesis: there is a slight difference between prison sentences served to people of the US that belong to marginalized sociodemographic groups.**

Number of Accused Who Received vs. Did Not Receive Prison Sentence

Is there temporality?

Prison Sentences by Year: Received vs. Not Received

Does the political leaning of the judge matter?

## Received Prison Sentence by Judge Political Leaning

Political Leaning: -1

Political Leaning: 0

Political Leaning: 1

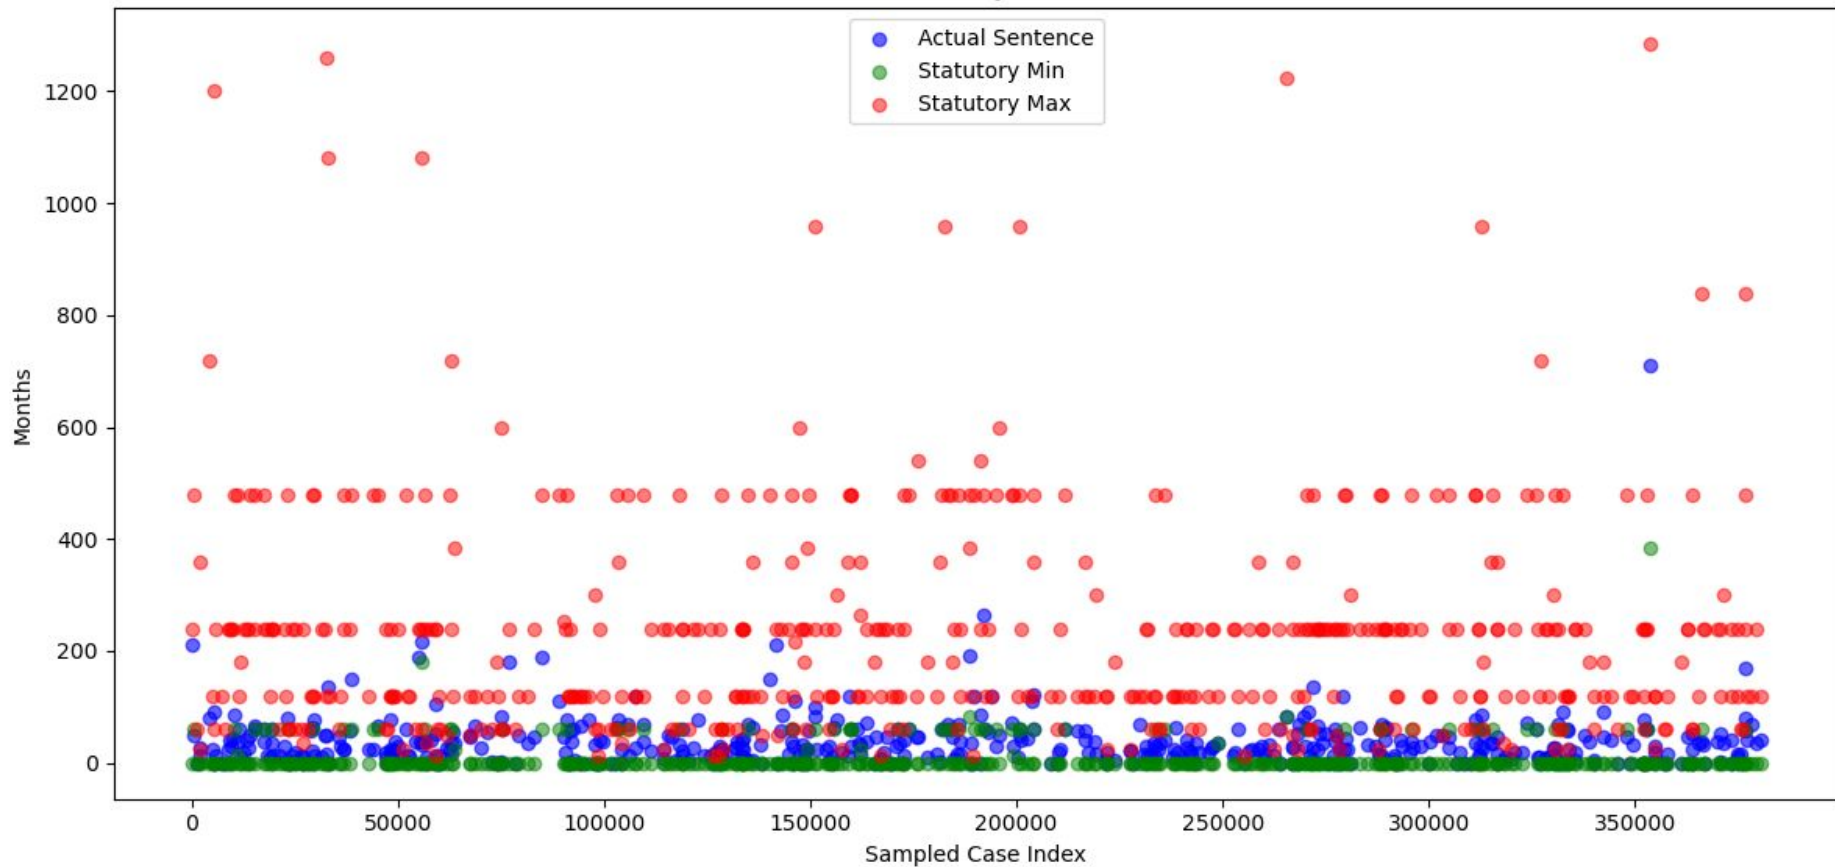

Distribution of Prison Sentence by Judge Political Leaning

Are sentences on the upper or lower side of the spectrum? Are they Consistent?

Actual Sentence vs. Statutory Minimum and Maximum

What about fines?

Actual Fine vs. Statutory Fine

Does race have a noticeable impact in the involvement with the judiciary system?

Distribution of Defendant Age by Race

Distribution of Restitution Cost by Race

Distribution of Fine Cost by Race

Distribution of Prison Sentence by Race

Distribution of Criminal History Points Applied by Race

# Prediction problem

What are the factors that predict how long will a sentence be? Are they all lawful or are there also demographic ones?

Predicting sentence length with:

- Demographic data
- Aggravants
- Amount and severity of statutes
- Political ideology / leaning
- Drugs / weapons implications
- Previous and recent defendant sentences
